SUMMARY

Reliable Tech Lead and Software Developer with over 24 years of experience in IT, specializing in custom software development, web applications, and the fintech sector. Expertise in Scala, Apache Spark, Java, AWS, Python, SQL, and Git. Adept at identifying and delivering business value within technical constraints, and open to learning new domains. Skilled in translating stakeholders' requests into effective technical solutions, with a strong focus on designing, implementing, optimizing, and troubleshooting complex high-load systems. Hands-on experience with large datasets and RESTful API implementation. Proficient in backend development within Java and Spring ecosystems, often applying a microservices architecture. Proactive contributor to Agile development processes, committed to delivering readable, maintainable, and scalable solutions that meet team and client standards.

TECHNOLOGY SUMMARY

Languages:	Scala, Java, Python, SQL, C#, PHP, PL/SQL, Delphi, Visual Basic, .NET VB/C#
Frameworks and Tools:	ZIO, Cats, Spring (Framework, Boot, Security), Type level, Play Framework, Akka, Apache Spark, ASP.NET, .NET Framework, AJAX, AngularJS, MS Visual Studio, Android SDK, Apache Kafka, NetBeans, MVC, REST, MapReduce, Hadoop, Flink, SOAP
Cloud and DevOps:	GitLab CI/CD, GitHub, Docker, Docker Compose, Kubernetes, AWS, Jenkins, Apache Ambari, Mesos, Yarn
DBMS:	PostgreSQL, MySQL, Oracle, Redis, Cassandra, HBase, Apache (Hive, Ignite), MS SQL Server
OS:	Red Hat Linux, Linux CentOS, Windows Server
Methodologies:	OOP, Test-Driven Development (TDD)
Team and Agile:	Agile, Scrum, Jira
Version Control:	GitLab, GitHub

PROFESSIONAL EXPERIENCE

EPAM Systems

Lead Development Engineer

April 2025 - Present (1 year)

*EPAM Systems, Inc. is a leading global provider of digital platform engineering and software development services. Founded in 1993, the company has evolved from a small software development shop into a multi-billion dollar enterprise listed on the New York Stock Exchange (**NYSE: EPAM**) and a component of the **S&P 500**.*

Responsibilities:

Talgat Shakirov

- Lead the design, development, and deployment of micro-services and API's using Scala 2.13/3.0 and Java 17.
- Architect and build robust, scalable solutions on AWS, leveraging services like S3, SQS, SNS, and EKS.
- Manage and optimize data storage solutions, primarily using MongoDB.
- Implement and maintain CI/CD pipelines using GitHub Actions.
- Deploy and manage containerized applications using Kubernetes.
- Design and implement flexible API's using GraphQL.
- Develop and manage data pipelines and workflows with Apache Airflow and Python.
- Provide technical leadership, code reviews, and mentorship to a team of talented software engineers.
- Collaborate with product managers and other stakeholders to define project requirements and timelines.

Akvelon

Software Development Engineer

April 2024 – March 2025

Akvelon is a software engineering services company that helps businesses across multiple industries implement value-generating solutions. It's an AI-turbocharged software engineering and consulting company entrusted by global clients. With robust industry-specific expertise, they have achieved over 24 years of experience in software and app development, data analysis, and digital transformation while leveraging the latest technologies.

- **Axoni** is an American technology company that develops blockchain software for financial institutions.

Responsibilities:

- Developed complex business logic using Scala, Java with ZIO and Cats, enhancing the scalability and maintainability of the system.
- Implemented integration of Apache Kafka topics in Scala to facilitate real-time data streaming and processing.
- Implemented integration of Spring framework on Java with Hibernate framework.
- Integrated GitLab CI/CD scripts to streamline build, test, and deployment processes;
- Utilized Spring Boot and Spring Kafka/Web as the foundation for developing secure and scalable applications;
- Authored YAML configurations for running Docker and Docker Compose, enabling efficient containerization and orchestration.
- Developed comprehensive unit and integration tests to validate the accuracy and reliability of the migrated codebase;
- Executed PostgreSQL script implementations to manage and manipulate database structures and data.

Used languages and technologies: Scala, Java, JPA, Hibernate, Cats, ZIO, GitLab CI/CD, Spring (Boot, Security), Apache Kafka, Docker, Docker Compose, PostgreSQL.

Talgat Shakirov

Criterion

Senior Scala Developer

March 2021 – April 2024

Criterion provides human capital management software for midmarket organizations in construction, financial services, nonprofits and higher education

Responsibilities:

- Developed complex business logic using Scala, focusing on frameworks like Akka, Play, Cats, and CatsEffect to ensure code efficiency and reliability;
- Leveraged functional programming principles extensively to ensure efficient and reliable code;
- Managed GitHub and Jenkins for streamlined code repositories and CI/CD pipelines, with deployments automated in AWS;
- Designed and built scalable integration applications in Scala and Java, employing the Java/JVM ecosystem and Spring Boot for responsive RESTful services;
- Implemented AWS S3 modules for efficient data storage and retrieval, optimizing performance in distributed systems;
- Enhanced database functionality and security for large datasets in PostgreSQL and MySQL, ensuring robust data integrity and secure application communication.

Used languages and technologies: Scala, Akka, Play Framework, Cats, CatsEffect, Java, REST, GitHub, Jenkins, AWS (S3), MySQL, PostgreSQL, Git, Redis.

VEON

Big Data Developer

April 2018 – March 2021

VEON is a global digital operator headquartered in Amsterdam, that provides converged connectivity and online services across six dynamic countries that are home to more than 7% of the world's population.

Responsibilities:

- Developed software projects using Scala, Java, and Python, incorporating functional programming with libraries like ZIO, Typelevel, and CatsEffect;
- Managed a high-load Apache Kafka project, optimizing data streaming and processing;
- Led a development team through the entire project lifecycle, from design to deployment, enhancing team collaboration and project execution;
- Migrated code from Scala to Java, ensuring a smooth transition while preserving system functionality;
- Applied Test-Driven Development (TDD) principles in a project focused on data-marts, where data showcases were collected and calculated daily for big data and data scientists;
- Designed and implemented RESTful APIs using Spring Boot, enhancing service interoperability and facilitating seamless communication between client applications and backend systems;
- Developed DataMarts with Apache Spark and MapReduce, focusing on advanced data analytics and performance optimization for large datasets;
- Configured servers for integration into the HDFS cluster using Hortonworks Hadoop assembly, ensuring proper setup for big data processing;

Talgat Shakirov

- Configured servers for integration into the Mesos cluster, optimizing resource management and orchestration for distributed applications;
- Developed security protocols for REST APIs, implementing OAuth and SSL/TLS to secure data transmission and authenticate user access;
- Implemented real-time data processing triggers using Apache Flink and Spark Streaming;
- Designed and managed databases using technologies like Cassandra, HBase, HIVE, and Apache Ignite, with a focus on scalability, performance, and security;
- Oversaw Kubernetes clusters and Docker containers, facilitating scalable and efficient application deployment and management.

Used languages and technologies: Java, Scala, Apache Spark, Typelevel, CatsEffect, MapReduce, Python, Apache Ambari, Hadoop, Mesos, Yarn, Apache Kafka, Flink, Cassandra, HBase, HIVE, Apache Ignite, Apache Flink, PostgreSQL, MySQL, Oracle, Docker, Kubernetes, REST, Test-Driven Development (TDD).

Alfa-Bank

Lead Developer

February 2017 – April 2018

Alfa-Bank offers corporate and retail lending, deposits, payments and accounts services.

Responsibilities:

- Facilitated task decomposition and allocated resources efficiently to ensure timely completion of project milestones;
- Conducted regular team meetings and one-on-ones, assessing progress and addressing issues, which improved team dynamics and productivity;
- Prepared detailed reports on project status and team performance, presenting to senior management to ensure transparency and support for strategic decision-making;
- Developed a Java vendor SOAP endpoint on JBoss Fuse, focusing on robust enterprise integrations;
- Created Java REST API and SOAP microservices using Spring Boot, with deployment managed through Docker to enhance scalability;
- Developed applications utilizing PostgreSQL and Oracle databases, optimizing data handling and schema efficiency;
- Wrote detailed technical and user manuals, incorporating security best practices for system architecture and communications;
- Enhanced REST services within the Java/JVM ecosystem using Spring Boot, improving backend efficiency and API response times;
- Implemented secure communication for REST APIs using HTTPS, OAuth2, and JWT to ensure data integrity and privacy;
- Managed Docker containers and Kubernetes clusters, standardizing development environments and streamlining deployment processes.

Used languages and technologies: Java, Spring Boot, Docker, Docker Compose, JBoss Fuse, REST, SOAP, PostgreSQL, Oracle.

Independent Contractor

Software Development Engineer

September 2015 – January 2017

Development for various clients under NDA.

Talgat Shakirov

Responsibilities:

- Developed and maintained corporate websites using ASP.NET, AJAX, and PHP, focusing on user experience and functionality;
- Created and managed SOAP interfaces with ASP.NET and PHP for reliable data exchange;
- Developed and optimized databases on Microsoft SQL Server 2012/2014, ensuring efficient data management;
- Prepared technical and user manuals, providing clear documentation for end-users and developers;
- Used Visual Studio 2013/2015 for .NET VB/C# development, improving code quality and project efficiency.

Used languages and technologies: C#, ASP.NET, AJAX, PHP, REST, SOAP, Microsoft SQL Server, Visual Studio, .NET VB/C#.

NT.Payments

Software Development Engineer

September 2015 - September 2016

NT.Payments is the largest payment system in the UAE.

Responsibilities:

- Supported, developed, and implemented corporate websites using ASP.NET, AJAX, and PHP;
- Developed and implemented SOAP interfaces with ASP.NET and PHP;
- Developed and implemented databases on Microsoft SQL Server 2012/2014;
- Prepared technical and user manual documentation;
- Utilized Visual Studio 2013/2015 for .NET VB/C# development.

Used languages and technologies: C#, ASP.NET, AJAX, PHP, REST, SOAP, Microsoft SQL Server, Visual Studio, .NET VB/C#.

G.Network

Lead .NET Developer

July 2012 - September 2015

G.Network is a full fibre broadband provider.

Responsibilities:

- Supported, developed, and implemented corporate websites using ASP.NET, AJAX, and PHP;
- Developed and implemented SOAP interfaces with ASP.NET and PHP;
- Developed and implemented databases on Microsoft SQL Server 2010/2012;
- Prepared technical and user manual documentation;
- Utilized Visual Studio 2010/2013 for .NET VB/C# development;
- Developed ERP systems, mass mail and SMS sending systems, and payment systems on ASP.NET;
- Provided process automation;
- Performed all database calculations;
- Provided broad-spectrum problem solving.

Used languages and technologies: C#, ASP.NET, AJAX, PHP, .NET VB/C#, Microsoft SQL Server, Visual Studio, SOAP.

Taulink

Talgat Shakirov

Senior .NET Developer

December 2010 – July 2012

Taulink is a Kazakhstan fast-payments platform.

Responsibilities:

- Supported, developed, and implemented corporate websites using C#, ASP.NET, AJAX, and PHP;
- Managed remote installation of the environment on thin clients, ensuring seamless setup for end users;
- Created and maintained image banks for business environments and developers, facilitating efficient setup and saving time for demos and development work;
- Developed solutions for the I-Bank payment service;
- Developed and implemented databases on Microsoft SQL Server 2010 using T-SQL;
- Supported and implemented crypto service providers;
- Performed all database calculations;
- Developed Corporation Customer Back Office and Live ID systems using ASP.NET;
- Developed billing systems on ASP.NET;
- Developed SOAP interfaces with an authorization system on ASP.NET;
- Provided broad-spectrum problem solving.

Used languages and technologies: C#, T-SQL, ASP.NET, AJAX, PHP, Microsoft SQL Server, Visual Studio, SOAP.

Innovative Network Space

Senior Developer

October 2007 – November 2010

Innovative Network Space focuses on peaceful space exploration, facilitating the exchange of technologies.

Responsibilities:

- Supported, developed, and implemented corporate websites using ASP.NET, AJAX, and PHP;
- Developed and implemented SOAP interfaces on ASP.NET;
- Developed and implemented databases on Microsoft SQL Server 2010 using T-SQL;
- Prepared technical and user manual documentation;
- Developed Corporation Customer Back Office and Live ID systems using ASP.NET;
- Developed SOAP interfaces with an authorization system on ASP.NET.

Used languages and technologies: C#, ASP.NET, T-SQL, AJAX, PHP, Microsoft SQL Server, Visual Studio, SOAP.

Open Accumulation Pension Fund Senim

Database Developer / Administrator

August 2003 – October 2007

Open Accumulation Pension Fund accumulates capital to be paid out as a pension for employees when they retire at the end of their careers.

Responsibilities:

- Acted as a Database Administrator for Microsoft SQL Server 2000/2005;
- Developed using T-SQL and PL/SQL;
- Supported, implemented, and developed software products using Visual Basic;

Talgat Shakirov

- Developed software products on Delphi 6.0 and MS SharePoint Portal Server.

Used languages and technologies: T-SQL, PL/SQL, Delphi, MS SharePoint Portal Server, Microsoft SQL Server, Visual Basic.

TALMZ

System Developer / Administrator

July 2002 – July 2003

TALMZ is a joint-stock company that offers services for metal industry and metal processing.

Responsibilities:

- Installed and implemented software products;
- Programmed using 1C.

Used languages and technologies: 1C.

CERTIFICATION

Java EE 7: Back-end Server Application Development Ed 2 PRV, ORACLE University

Microsoft Certified Application Developer (MCAD): For Microsoft .NET

Microsoft Certified Solution Developer (MCSD): For Microsoft .NET

Microsoft Certified Professional (MCP)

Microsoft Certified Database Administrator (MCDBA) : MS SQL 2000 Microsoft

Microsoft Certified Technology Specialist (MCTS) : MS SQL 2005 Microsoft

Microsoft Certified Systems Administrator (MCSA): Windows Server 2003

Microsoft

Microsoft Certified Systems Engineer (MCSE): Windows Server 2003 Microsoft

EDUCATION

Master's Degree in Mechanic-Mathematic

Kazakh National State University after Al-Farabi
